

Hi, my name is **Rodrigo Queirós** and I am **22 years** old. I recently completed a **degree in Web Development** with distinction and I am currently looking for my first job in the **front-end development** field.

I am an extrovert person who has been passionate about technology and its evolution since childhood.

As a result, I've become highly motivated and focused to learn more and improve in this field.

# Rodrigo Queirós

— FRONT-END DEVELOPER —

## EDUCATION

**Degree in Web Information Systems and Technologies**  
**ESMAD, 2017 - July 2020**

## WORK EXPERIENCE

**May - June 2020 | Front-end developer**  
**Curricular internship at Zalox**

At Zalox I developed an informative SPA to help the company promote an application they were developing. I also had the opportunity to perform performance, SEO, accessibility, crossplatform, good practices and unit tests for both the SPA and the platform under development.

Testing | Responsiveness | Css  
Crossplatform | Git | Docker | Vue.js

**June - Sep 2019 | Fullstack developer**  
**Summer internship at ioTech**

At ioTech, I helped the company to develop a platform in order to get more customers from referrals by other customers or agents. The business scheme was simple, the customers or agents who helped the company to get more customers were rewarded on the platform with several awards to choose from.

Node.js | Express.js | MongoDB | Vue.js | Bulma | Buefy  
Git | Arduino

**Nov 2018 - Feb 2019 | Research Scholarship**  
**at uniMAD (research center at ESMAD)**

Research scholarship about videogames and social sciences.

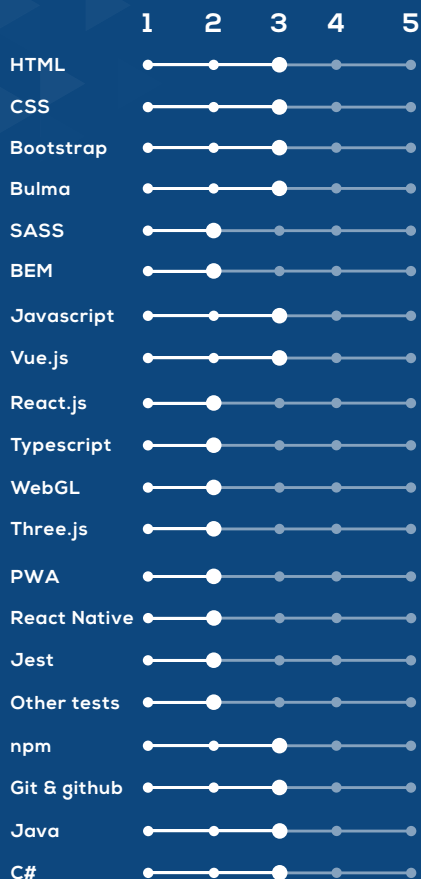

Data research and organization | Scientific article  
Statistical methods | Focus group organizer  
Development of research website

## Freelancer

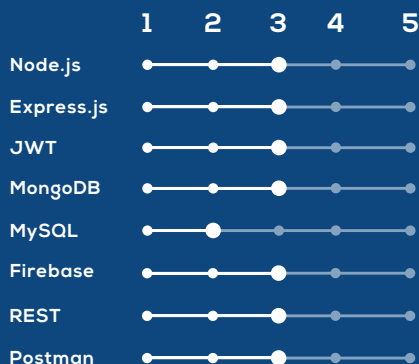

- SPA for a university professor to demonstrate our research
- Mobile app using react native for an electric car charger company

# SKILLS

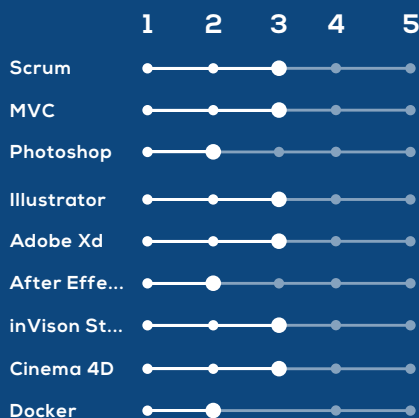

## FRONT-END

## BACK-END

## OTHER

- 1 Started studying it a little while ago or haven't practiced much yet
- 2 Developed a few projects and would like to explore it more
- 3 I understand the technology well and have some experience
- 4 Great knowledge and a few years of professional experience
- 5 Many years of professional experience and mastery of the technology

## Introduction Letter

My name is Rodrigo Queirós and I'm Portuguese.

For me, working as a front-end developer is joyful and also a respectable way to achieve my professional and personal goals. The reasons and credits of why I chose this field of work is entirely dedicated to my love for technology and art. In this field I'm able to combine my creativity and dedication to create the best designs and animations, while at the same time keeping a logical mindset which allows me to look for solutions and solve problems. I've recently acquired a degree in Web Information Systems and Technologies at the "Escola Superior de Media Artes e Design" of the Polytechnic Institute of Porto with distinction, as can be seen in the letter of recommendation on the next page. During this 3 years of study, in addition to achieving good grades (16/20 or 8/10) I always participated in various activities, such as web related lectures, game jams, course delegate, English course among others, in order to evolve as a professional and as a person.

My main goal is to further improve my skills and knowledge, gain experience and become the best person I can be with effort, dedication and a smile.

I will be available to arrange a meeting or clarify any doubts.

Sincerely,  
Rodrigo Queirós

---

LR

**RECOMMENDATION  
LETTER**

To whom It may concern:

Rodrigo Daniel Lopo de Queirós studied at the Superior School of Media Arts and Design, Polytechnic of Porto, from 2017 (September) to 2020 (July), having attended the Degree in Technologies and Information Systems for the Web.

Rodrigo Queirós showed, throughout his academic career, a great desire to learn and develop their skills, both transversal and technical. Performed his academic tasks efficiently, responsibly and with a remarkable commitment, as evidenced by the conclusion of the degree in 3 years. As course coordinator, I can attest to Rodrigo's competence, dedication, and commitment, being for us a reason of satisfaction to have students with the character of Rodrigo.

The academic internship, held at the Zalox<sup>1</sup>, proceed in a very positive way, with the company expressing its great pleasure for the work developed.

Rodrigo Queirós has several strengths such as his autonomy, persistence, willingness to learn and he has always shown an additional interest in helping other people. He also participated in several extracurricular activities, such as: course delegate, member of the course council (representing students), in the process of evaluating and accrediting the degree, among others. He also participated in numerous seminars and workshops held at the Institution. Besides these valences, it reveals excellent skills in the technological context, mainly in the field of computer programming.

I am available for additional information.

Best regards,

August 6, 2020

Mário Pinto  
Degree Coordinator
